Work

Consensus Networks   Jul 2020 – Present

Lead Engineer

Consensus Networks is building hardware and software infrastructure to protect, monitor, and mobilize assets.

Highlights

- Architect blood supply/demand module to integrate with Navy medical
- Build sites, contracts, and distributed systems for secure peer-to-peer networks

Contractor   Jul 2019 – Present

Software Engineer

Providing large to small businesses with secure and lightweight software development services.

Highlights

- Develop enterprise apps for a diverse set of device platforms
- Create maintainable software and release workflows for businesses

Local Goods   Aug 2021 – Dec 2022

Local Goods

Technical Cofounder

Local Goods was building digital tools for entrepreneurship, fitness, and learning.

Highlights

- Build ecommerce storefront widgets to support shoppers and merchants
- Invent fitness and learning applications using high quality data, statistics, and ML

Otter Therapies   Jul 2019 – Oct 2020

Technical Cofounder

Otter Therapies was building a collaborative care coordination platform for special needs parents, therapists and caregivers.

Highlights

- Build an app for care teams with chat, files, and event scheduling
- Design secure architecture for handling sensitive patient data

Vital View Technologies   Apr 2019 – Dec 2019

Technical Product Manager

Vital View Technologies is building a non-contact health sensing platform for chronic disease care.

Highlights

- Prototype algorithms to process breathing and heartbeat signals
- Manage product milestones and coordinated engineering team meetings

Education

University of Notre Dame   May 2018 – Apr 2019

Engineering, Science, and Technology Entrepreneurship

M.S.

Saint Anselm College   Aug 2014 – Apr 2018

Applied Physics with Computer Science and Math

B.A.

Projects

Base   Dec 2022 – Present

Measurable body and mind fitness training

Highlights

- Process real-time HRV data using DFA1 to approximate lactate threshold
- Build native apps for passively measurable workouts (e.g. zone 2 training)
- Experiment with WASM to run C++ statistical models in the browser

Awards

McCloskey New Venture Competition   Mar

Winner

Awarded by **Mendoza College of Business**

Vital View Technologies won the McCloskey New Venture Competition.

Skills

Development

C++   TypeScript   Python

Infrastructure

AWS   Docker   Shell
